YOU CAN EARN UP TO $47
BY PARTICIPATING IN A RESEARCH STUDY

If you are Male and between the ages of 14 and 17, you may be eligible to participate in a research study using mobile touchscreen devices to measure how everyday experiences affect your well-being.

What will I do? First, you will meet with a researcher and answer questions about your feelings, activities, experiences, and relationships. You will also be asked to provide a small saliva sample, and you will receive some compensation. Second, you will be provided with a mobile device and will be asked to complete 3 mobile surveys each day for 9 days as you go through your daily routine. After the 9 days of the study, you will return the device to us and receive any remaining compensation.

Where will I meet the researchers? We can meet you at your home, school, or a public location such as your local public library.

How much will I get paid? You will be able to earn up to $47 for being a part of our study. Plus, you can earn multiple entries into our raffle to win your very own iPad device.

Do I need my parent’s permission? Yes, your parent or guardian must provide consent in order for you to participate in this study.

How do I sign up?
If you are interested in finding out more about our study, just call our office at 919-613-7445
Or email us at weekinthelife@duke.edu

This project is being conducted by Dr. Candice Odgers, Professor of Psychology and Public Policy at Duke University. The purpose of this study is to find out how adolescents’ daily experiences (such as interactions with parents, teachers and peers) affect their behavior, school performance, and health in daily life.
